**[www.intra.hus.fi](http://www.intra.hus.fi)**

*The basis of this HUSRES 2013 report is the HUSLAB/Whonet database 2013, which contains susceptibility data on more than 190.000 microbes isolated and studied in 2013 by HUSLAB. The susceptibility interpretations are according to EUCAST 2014.*

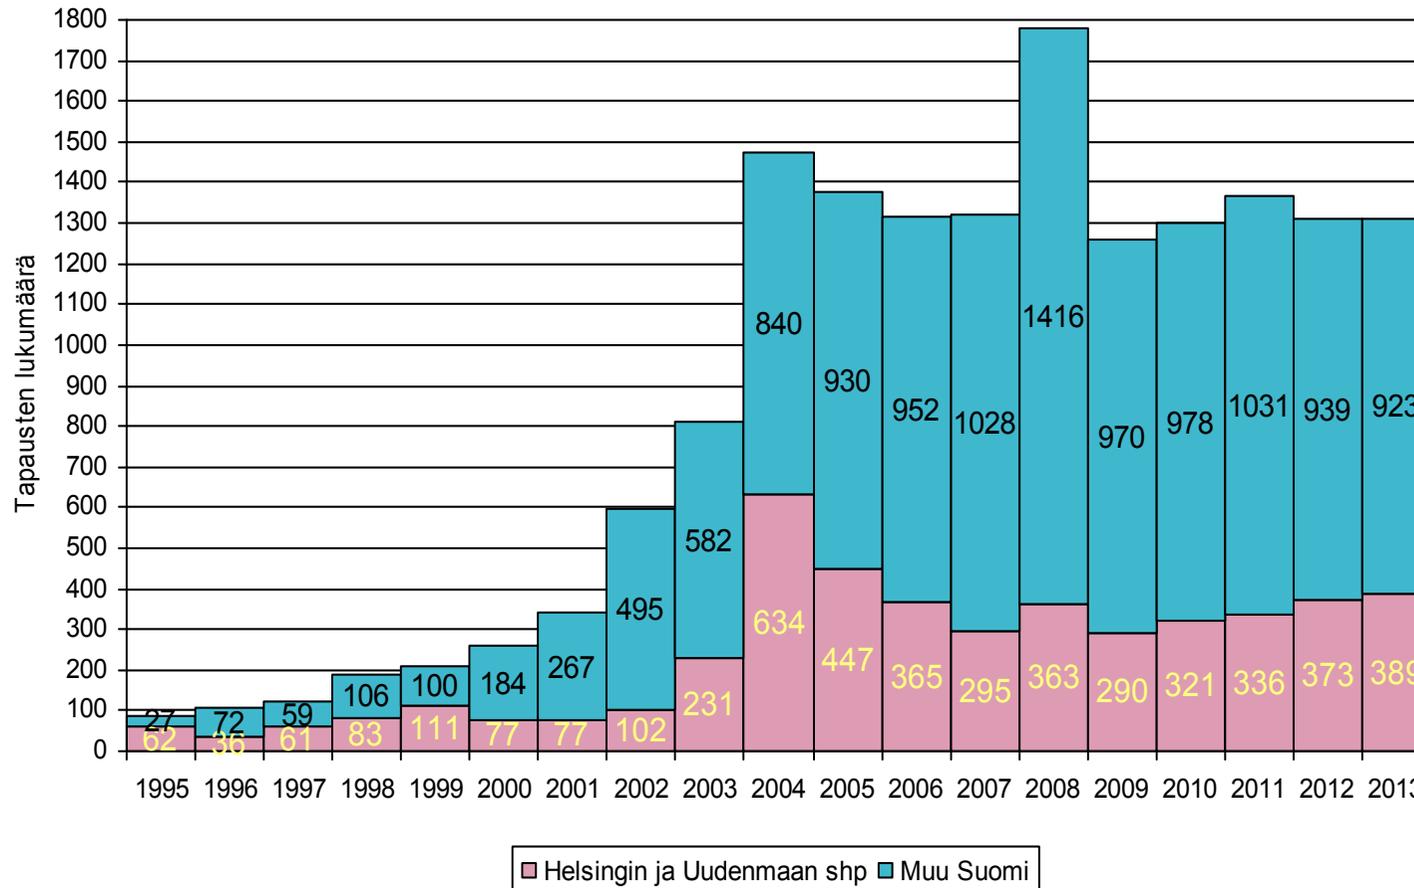

*The isolates originate from patients in Helsinki University Central Hospital, other hospitals in Helsinki - Uusimaa region, as well as outpatient health centers.*

*HUSRES 2013 report contains data on 31 clinically most important bacterial species/groups.*

*Previous annual reports from 2000 are also located at [www.huslab.fi](http://www.huslab.fi)*
